Instructions for the Resistance X-Wing paper model

You will need to print both sheets of the template on 110LB card stock. Tools suggested for building are scissors, tacky glue, a hobby knife, tweezers and a black marker.

Start by cutting out parts 1-7

Fold each part. Glue the unmarked tabs of parts 1, 4 & 3 and assemble them.

Attach part 1 to part 2

Attach part 3 to part 2

Attach part 4 to the tabs on parts 2 & 3

Attach part 5 to the tabs on parts 3 & 4

Close the bottom of the fuselage by gluing part 7 to the remaining tabs

Prepare part 6

Fold and glue part 6 together

Glue part 6 to the marked location on part 5

Cut out all parts from section 8

Fold and glue parts a-g together

13
Attach parts a & b to the wing section

14
Attach parts c, d & e to the wing as shown.

15
Attach part f to part e then slide part g over part f and curve it as shown

16
Repeat steps 11-15 for sections 9, 10 & 11 then cut out x & y

17
Attach the parts marked x to the bottom of the upper wings and y to the lower wings as shown

18
Glue the upper and lower wings of each side together (see figure 1 below)

19
Glue the wings to the fuselage (see figure 1 below)
